SUMMARY

I strive to work with organizations centered on holistic analysis, open dialogue, and achievable goals. My passions lie in eliminating toil and providing teams with reliable environments in which they can rapidly iterate. I find that when focus is placed on secure environments, repeatable results, and testable code teams can move fast and **not** break things.

EMPLOYMENT

Droit/FIS

April 2023 – Present

Devops | April 2023 – Present

- Assisted migration from clickops to complete IaC management using Terraform
- Reduced AWS spend by 20%, adding karpenter to AWS EKS
